

## Plantronics Manager and Plantronics Hub for Windows/Mac

Plantronics Manager and Plantronics Hub, both part of our Spokes software offering, work together to give enterprises total control and flexibility over their Plantronics audio headsets and devices.

Plantronics Manager provides IT with easy to use tools to configure settings and update firmware for end-users across the enterprise. Plantronics Manager does not store inventory or configuration information and Plantronics Hub is not connected to the Plantronics cloud, so all updates/configuration files are deployed to a local file server for distribution inside a firewall. However, the system administrator should use a web browser to connect to the Plantronics cloud to operate Plantronics Manager.

Plantronics Hub for Windows/Mac is a client application that works with Plantronics Manager and allows end users to control the settings on their Plantronics audio device within the parameters established by IT.

### Problems:

- IT needs to modify audio device settings for hundreds of users to comply with company policy
- IT needs to push a firmware update to hundreds of users

### Solution:

Plantronics Manager with Plantronics Hub for Windows/Mac

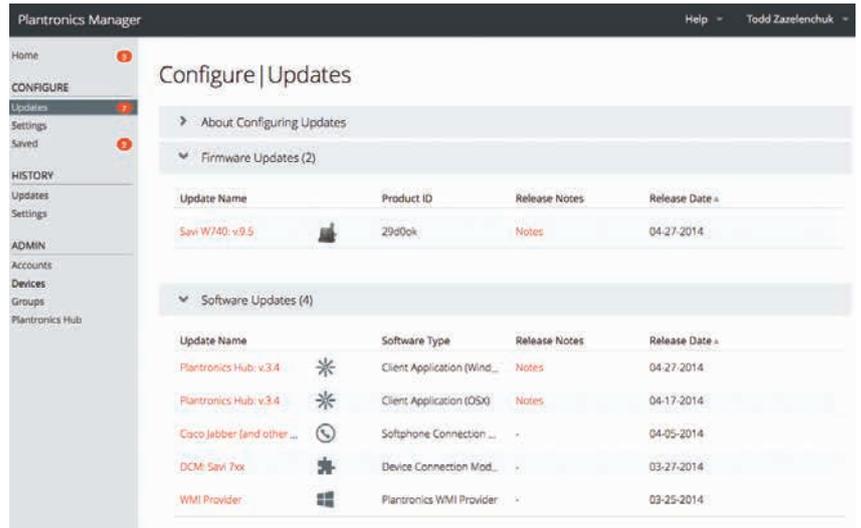

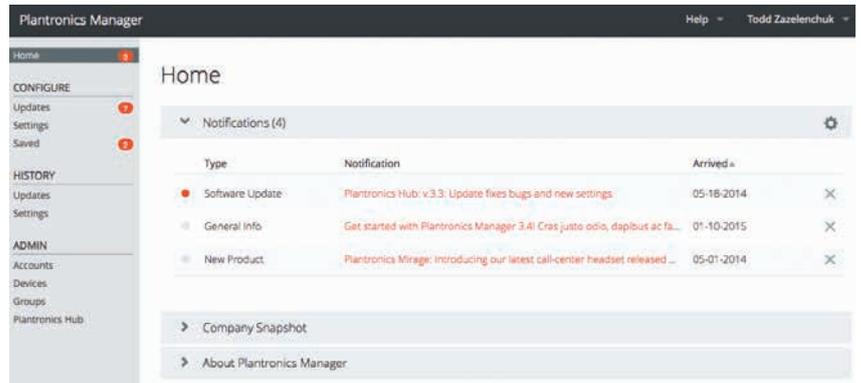

## Plantronics Manager

### SIMPLIFY ADMINISTRATION OF PLANTRONICS DEVICES WITH AN ENTERPRISE-GRADE SERVICE

- Easily deploy all device firmware upgrades
- Enable or disable device settings according to company policy or for regulatory compliance
- Configure devices quickly and consistently

### OPTIMISE ASSET UTILIZATION

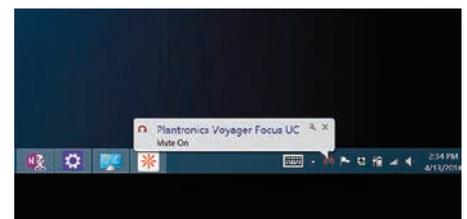

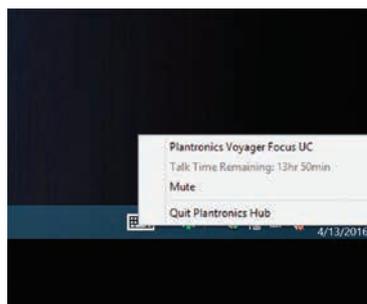

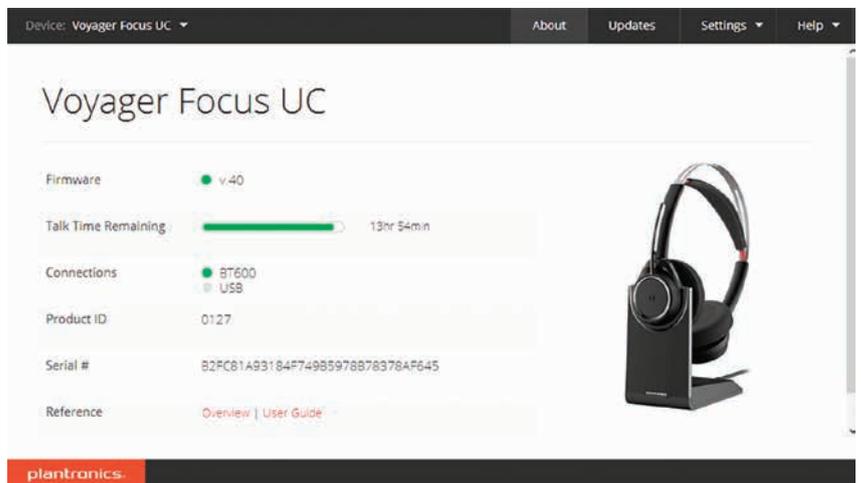

- Monitor Plantronics device settings and firmware updates
- Ensure audio devices are always up-to-date and have the correct setting configuration

## Plantronics Hub

### EMPOWER USER PRODUCTIVITY

- Enable device-level call control with call answer/end, mute, volume adjust
- Access intuitive user features such as visible mute status, battery status, and mute control
- Avoid disrupting normal workflow with silent installation option
